Tibidabo Scientific Industries Ltd Announces a New Virtual Office in Lviv, Ukraine, and Seeks to Hire Seventy-Five Full-Time Local Employees

Lviv, Ukraine and Dublin, Ireland - 7 March 2022 - Tibidabo Scientific Industries Ltd (“Tibidabo Scientific”), a global leader in highly differentiated technology for scientific research, aerospace, and industrial markets, today announces the opening of a new virtual office in Lviv, Ukraine.

With offices in the United States, Ireland, the Netherlands, and the United Kingdom, Tibidabo Scientific provides its products and solutions in over fifty countries. “Like other global companies, a number of our employees have families directly impacted by the ongoing tragic events in Ukraine,” said Viktoriya Baytser, Director of Tibidabo Scientific and CEO of Precision X-Ray. “Ukrainian people's courage and resolve are an immense source of inspiration to us all,” said John LaViola, CTO of Tibidabo Scientific. “We feel privileged to offer these opportunities in Ukraine at this critical moment and look forward to welcoming our Ukrainian employees into the Tibidabo Scientific family.”

“Tibidabo Scientific has long planned to establish a Ukraine-based Research and Development Center,” added Viktoriya Baytser. “We accelerated our plans in response to the current horrific, unprovoked, and immensely tragic situation. Effective immediately, we are creating 75 positions across areas of mechanical, electrical, electronic, and software engineering along with other professional and administrative positions.”

Tibidabo Scientific remains acutely aware of the priorities of Ukrainian people whose lives have been upended. As such, the new positions will be fully salaried with work requirements on an “as available and virtual basis”, until further notice. Ms. Baytser added, “We will support employees as they tend to their families and friends throughout this unfolding humanitarian crisis. Our company also intends to provide Starlink (Space X) Internet terminals and other equipment to employees as needed.”

We ask those interested in joining the Tibidabo Scientific family in Ukraine, to please contact us at ukraine@tibidaboscientific.com.

About Tibidabo Scientific Industries

Tibidabo Scientific Industries is a global leader and supplier in highly differentiated technology for scientific research, aerospace, and industrial markets. We succeed by helping customers push boundaries in radiobiology, stem cell research, high performance imaging, radiation detection, surveillance, space exploration and advanced scintillators.

With our roots dating back to H2S phosphor screens in radar critical to the Allied defense during World War II, the impact of our products is now felt from the deepest recesses of the earth, to cutting edge cancer research, and to the far reaches of space.

TIBIDABO

SCIENTIFIC INDUSTRIES

Our collaborative approach and expanding global team enable our customers to make smarter decisions and adopt more effective solutions with ground-breaking technologies. Our philosophy, culture and strategy are guided by the Tibidabo Business Matrix (TBM), a customer, quality, performance, and people-oriented management approach with a system of continuous improvement at its core.
